

PIR SENSOR LIGHTING CAMERA with white LED

It features

- The built-in PIR sensor turns the white LEDs on when motion is detected at night
- Image stays in color mode even at night
- Sudden intense lighting to deter intruders
- Enforced security functions(See below diagram)
- Trigger out feature to save space on the HDD
- Energy saving

Alarm out (Lamp, Siren)

- Built-in PIR sensor turns the white LEDs on and trigger external devices (Siren, Lamp) simultaneously when motion is detected. Only during night time.

Sensor input (Magnetic, PIR)

- Remote sensor activates the white LEDs on the camera and other devices simultaneously when an event occurs. Only during night time

Trigger Alarm out (DVR)

- PIR sensor detects motions and triggers event recording on the DVR (day & night time)
